PRIORITY ACTION ITEMS

- 1 robots.txt** Score: 0

Create a robots.txt file at the root of your domain to guide search engine crawlers.

robots.txt controls which pages search engines can crawl. Missing or misconfigured robots.txt can block indexing.
- 2 XML Sitemap** Score: 0

Create an XML sitemap and submit it to Google Search Console.

An XML sitemap helps search engines discover all your pages, especially new or deep content.
- 3 Structured Data** Score: 0

Add structured data (JSON-LD) to help search engines understand your content and enable rich results.

Schema markup (JSON-LD) enables rich results in Google — stars, FAQs, breadcrumbs — increasing click-through rates.
