PRIORITY ACTION ITEMS

- 1 Title Tag** Score: 40

Title is too short (3 chars). Aim for 50–60 characters.

Your page title appears in search results and browser tabs. It should be 50–60 characters and include your primary keyword.
- 2 Meta Description** Score: 40

Meta description is too short (35 chars). Aim for 150–160 characters.

The meta description is the snippet shown in search results. Aim for 150–160 characters with a clear call to action.
- 3 Heading Structure (H1)** Score: 0

Add one H1 tag. Every page should have exactly one H1 heading.

One H1 per page helps search engines understand your page's main topic. Multiple H1s dilute your SEO signal.
- 4 XML Sitemap** Score: 0

Create an XML sitemap and submit it to Google Search Console.

An XML sitemap helps search engines discover all your pages, especially new or deep content.
- 5 Canonical URL** Score: 0

Add a canonical URL tag to prevent duplicate content issues.

Canonical tags prevent duplicate content issues by telling search engines which URL is the primary version.
