

AUDITED URL

<https://buffer.com>

PRIORITY ACTION ITEMS

- 1 Title Tag** Score: 40

Title is too short (16 chars). Aim for 50–60 characters.

Your page title appears in search results and browser tabs. It should be 50–60 characters and include your primary keyword.
- 2 Meta Description** Score: 0

Add a meta description. It should be 150–160 characters.

The meta description is the snippet shown in search results. Aim for 150–160 characters with a clear call to action.
- 3 Heading Structure (H1)** Score: 0

Add one H1 tag. Every page should have exactly one H1 heading.

One H1 per page helps search engines understand your page's main topic. Multiple H1s dilute your SEO signal.
- 4 robots.txt** Score: 0

Create a robots.txt file at the root of your domain to guide search engine crawlers.

robots.txt controls which pages search engines can crawl. Missing or misconfigured robots.txt can block indexing.
- 5 XML Sitemap** Score: 0

Create an XML sitemap and submit it to Google Search Console.

An XML sitemap helps search engines discover all your pages, especially new or deep content.
